

SOVIET ELECTROCHEMISTRY

Volume I

Table of Contents

Foreword	1
SECTION 1. DOUBLE LAYER ADSORPTION	3
Interpretation of Differential-Capacity Curves Obtained on a Metal-Solution Interphase. <u>D. Grahame</u>	5
Kinetics of Electrochemical Reactions and the Electrocapillary Zero of Metals. <u>L. I. Antropov</u>	11
Specific Adsorption at the Mercury-Solution Interphase. <u>Roger Parsons</u>	18
Study of the Specific Adsorption of Ions and Position of the Electrocapillary Zero by Means of Tracers. <u>N. A. Balashova and N. S. Merkulova</u>	23
Charging Curves of Powdered Catalysts and Adsorbents. <u>Yu. A. Podvyazkin and A. I. Shlygin</u>	27
Discussion	31
SECTION 2. KINETICS	37
Some Results of Developments in the Study of Electrochemical Reaction Mechanisms in the Last Five Years. <u>A. N. Frumkin</u>	39
Stages Determining the Rate of Electrolytic Liberation of Hydrogen and Oxygen. <u>J. O'M. Bockris</u>	56
Effect of Temperature on Electrolysis as a Kinetic Method of Investigating the Nature of Electrochemical Processes. <u>S. V. Gorbachev</u>	63
Application of Radioactive Tracers to the Study of Ionization and Discharge of Metal Ions on Amalgam Electrodes. <u>V. V. Losev and A. M. Khopin</u>	72
Electrode Processes in Molten Oxides. <u>O. A. Esin</u>	80
Investigation of the Phenomenon of Overvoltage in Molten Salts. <u>R. Piontelli, G. Sternheim, M. Francini and G. Montanelli</u>	90
Investigation of Ion Exchange Between a Molten Metal and Its Salt with the Aid of Radioactive Isotopes. <u>Yu. V. Baimakov and N. S. Nikitenko</u>	95
Discussion	99
SECTION 3. HYDROGEN OVERVOLTAGE	107
Investigation of the Mechanism of Hydrogen Liberation on an Iron Cathode. <u>M. Smyalovskii, B. Baranovskii, Z. Shklyarskaya-Smyalovskaya, K. Skalch'movskii, G. Angershtein, A. Kunstetter, M. Zhubr, and G. Yarmolovich</u>	109
Action of Atomic Hydrogen on Polarized Electrodes in Electrolyte Solutions. <u>S. D. Levina and T. V. Kalish</u>	114
The Effect of Diffusing Atomic Hydrogen on the Potential of Polarized Iron and Electro- deposits on It. <u>I. A. Bagotskaya and A. I. Oshe</u>	117

Table of Contents (continued)

Role of Inorganic Ions in the Electrolytic Liberation of Hydrogen from Acid Solutions on a Rotating Cathode. <u>R. M. Vishomirskis and Yu. Yu. Matulis</u>	121
The Influence of the Nature of the Cations on the Overvoltage of Hydrogen Liberation from Alkaline Solutions at a Mercury Cathode. <u>Z. A. Iofa and E. A. Maznichenko</u>	125
Hydrogen Overvoltage on an Iron Cathode in an Alkaline Solution in Relation to the State of the Surface. <u>E. M. Kuchinskii and I. E. Veselovskaya</u>	129
Discussion	134
SECTION 4. DIFFUSION KINETICS	137
The Diffusion Kinetics of Electrochemical Reactions. <u>V. G. Levich</u>	139
A Formulation of the Problem of Evaluating the Concentration Polarization in Transient State Electrolysis. <u>S. V. Gorbachev</u>	149
Certain Experiments in a Study of Convective Diffusion. <u>A. I. Fedorova, G. L. Vidovich, L. I. Boguslavskii, and V. D. Yukhtanova</u>	153
A Refractographic Study of Concentration Polarization in the Dissolution and Deposition of Metals. <u>E. I. Grabova</u>	156
The Measurement of the Concentration of the Potential Determining Ions in the Electrolyte Surrounding an Electrode. <u>G. P. Dezider'ev and S. I. Berezina</u>	159
The Diffusion of Oxygen Through Thin Electrolyte Films. <u>I. L. Rozenfel'd and K. A. Zhigalova</u>	163
Discussion	168
SECTION 5. POLAROGRAPHY	175
Review of the Latest Theoretical Work of the Prague School of Polarography. <u>J. Koutecký</u>	177
Effect of the Radius of Base Electrolyte Cations on the Reduction of Persulfate Anion on a Mercury Electrode. <u>N. V. Nikolaeva-Fedorovich and B. B. Danaskin</u>	183
Mechanism of the Reduction of Some Oxygen-Containing Anions. <u>S. I. Zhdanov, V. I. Zikov, and T. V. Kalish</u>	191
Effect of Organic Solvents on the Height of the Wave and the Half-Wave Potential of Organic Depolarizers. <u>K. Schwabe</u>	196
Effect of the Position of the Electrocapillary Zero on the Reduction of Indium on a Mercury Dropping Electrode. <u>P. I. Zaboltn, S. P. Bukhman, and G. Z. Kir'yakov</u>	203
Kinetics of the Liberation of Cadmium from Cyanide Complexes on Dropping and Streaming Mercury Electrodes. <u>J. Koryta</u>	209
Reduction of Chlorite Ion on a Mercury Dropping Electrode. <u>Sh. S. Shchegol'</u>	215
Mechanism of the Formation of a Catalytic (Kinetic) Wave in Solutions Containing Molybdate Ion and Perchloric Acid. <u>S. I. Sinyakova and M. I. Glinkina</u>	219
Techniques of Oscillographic Polarography. <u>Robert Kalvoda</u>	223
Determination of the Composition of Discharging Zinc Complexes by Amalgam Polarography. <u>A. G. Stromberg</u>	230
Reduction of Oxygen to Hydrogen Peroxide on a Mercury Electrode in Acid Solutions. <u>J. N. Agar</u>	235
