

RUSSIAN JOURNAL
of PHYSICAL
CHEMISTRY

is a cover-to-cover
translation
starting with the
July 1959
issue of

ZHURNAL
FIZICHESKOI
KHIMII

a monthly
publication of

The ACADEMY
of SCIENCES
of the U.S.S.R.

The English
language version
is published by

The CHEMICAL
SOCIETY

with the support of

The DEPARTMENT
of EDUCATION
and SCIENCE

The Journal is
translated and
produced by

INFOSEARCH Ltd.

and issued in
monthly parts that
correspond to the
Russian original.

SUBSCRIPTIONS:

All orders should
be sent to the
sole distributors

CONTENTS OF VOLUME 40, 1966

January

V. V. BOLDYREV and V. I. EROSHKIN: The effect of radiation on the rate of thermal decomposition of silver nitrite (3)	1	I. V. SMIRNOVA, A. A. KUBASOV, and K. V. TOPCHIEVA: Adsorption of cyclohexene from solution in n-heptane under conditions remote from catalytic conversion (88)	44
S. S. NIKOL'SKII: Interpolation of the properties of solutions as functions of composition. III. Interpolation formulae (5)	2	E. N. VIKTOROVA, V. V. ZELINSKII, and N. F. NEZNAIKO: Effect of phenyl groups on the fluorescence yield of aminophthalimides (94)	47
A. B. ZDANOVSKII and V. M. IMAMUTDINOVA: Effect of temperature on the rate of dissolution of borates (12)	6	A. F. FROLOV, M. A. LOGINOVA, B. I. PANTUKH, and B. F. USTAVSHCHIKOV: Liquid-liquid equilibrium in the ethyl acrylate-ethanol-water system (100)	50
M. V. IONIN and N. N. BAZHENOVA: Mechanism of the cathodic reduction of hydrogen from aqueous solutions of salts of non-noble metals (16)	8	M. I. KOZLOVSKII: Kinetics of crystallisation on the surface of aqueous salt solutions on passage of a spark discharge (102)	51
V. L. ANTONOVSKII and V. A. TEREENT'EV: Behaviour of ketone peroxides in solution. III. Effect of the hydrogen bond on the kinetics of the dissociation of 1-hydroxy-1'-hydroperoxydicyclohexyl peroxide (19)	9	L. K. LEPIN' and A. Ya. VAIVADE: Temperature dependence of effect of pH on rate of oxidation of iron in salt (potassium chloride) solutions (107)	53
A. I. GORBUNOV: Relation between the heats of chemisorption of gases on metals (25)	12	A. B. FASMAN, T. KABIEV, D. V. SOKOL'SKII, N. I. MOLYUKOVA, A. A. BATKOV, I. V. KIRILYUS, and K. T. CHERNOUSOVA: Modification of Raney nickel catalyst by additions of transition metals. I. Mechanism of promotion by molybdenum (114)	56
M. O. TERESHKEVICH and E. Yu. POZHIDAIEVA: The mobility of oxygen atoms in certain anions in mixed solvents (27)	13	Yu. Kh. SHAULOV, G. O. SHMYREVA, and V. S. TUBYANSKAYA: Heat of combustion of borine ammoniate (122)	61
D. A. KNYAZEV, A. N. BANTYSH, and A. A. IVLEV: Thermodynamics of isotope exchange. I. Statement of the problem. Method of calculation of the ratios of partition functions (32)	16	M. E. AKOPYAN and F. I. VILESOV: A mass-spectrometric study of the photo-ionisation of benzene derivatives at wavelengths up to 885 Å (125)	63
E. M. PERESLENI, V. I. SHEICHENKO, and Yu. N. SHEINKER: Tautomerism in heterocyclic compounds. XVIII. Nuclear magnetic resonance spectra and structure of certain derivatives of 2-aminothiazoline and their salts (38)	19	L. A. REZNITSKII: Approximate estimates of the heats of formation of certain compounds of transition metals of Groups IV and V (134)	68
N. E. KHOMUTOV and M. F. SOROKINA: Effect of electrode material on the kinetics of anodic processes in potassium carbonate solutions (44)	21	A. V. KISELEV, Yu. S. NIKITIN, V. K. CHUIKINA, and K. D. SHCHERBAKOVA: Effect of heat-treatment on subsequent chemical modification of silica gel with trimethylchlorosilane for gas chromatography (140)	71
E. B. TREIVUS: Kinetics of the dissolution of potassium nitrate single crystals in a flowing solution (49)	24	A. F. FROLOV, M. A. LOGINOVA, G. S. FADEEVA, and B. F. USTAVSHCHIKOV: Mutual solubility and phase equilibrium in the methacrylamide-isobutyl acetate-water system (145)	73
V. A. ROGINSKII, A. G. KOTOV, and S. Ya. PSHEZHETSKII: Formation and reactions of radicals in alcoholic hydrazine solutions at low temperatures (51)	25	G. A. YUNITSKII and V. V. TARASOV: Changes in structure and compressibility of alkali-metal borate glasses with content of alkali-metal oxide (148)	74
V. I. KODOLOV: Possibility of calculating the steric parameter E_s in the Taft equation (56)	28	V. F. KOVTUN, Yu. A. TARAN, and I. O. MOSKALIK: Iron(III) silicates of the type $Fe_2O_3 \cdot 2SiO_2 \cdot 4H_2O$ and their behaviour when heated (153)	77
I. M. KOLESNIKOV, G. M. PANCHENKOV, V. A. TULUPOV, and V. S. DEMIDOV: Kinetics of the dehydration of propan-2-ol on a crystalline aluminosilicate. I. Kyanite (59)	29	S. V. TSUKERMAN, KUO-SHENG CH'ANG, and V. F. LAVRUSHIN: Dipole moments of quinoline analogues of chalcone (160)	80
A. T. VAGRAMYAN and N. K. BARABOSHKINA: Reflectance and structure of thin layers of electro-deposited nickel (63)	31	A. V. FINKEL'SHTEN and Z. M. KUZ'MINA: Correlation of solvatochromic effect with rate of catalytic hydrogenation of nitrobenzene derivatives on Raney nickel modified with platinum (166)	83
M. P. SUSAREV and A. N. GORBUNOV: Calculation of constant-pressure liquid-vapour equilibrium in a ternary system having two components which form nearly ideal binary solutions (68)	34	V. A. BELYAEVA and L. P. KHOLPANOV: Relation between characteristic temperature and dissociation energy of crystalline halides of Group I metals (170)	85
P. P. KUZ'MENKO, G. I. ONOPRIENKO, and E. I. KHARKOV: Diffusion of impurities in molten tin and lead (73)	37	V. A. ROGINSKII and A. G. KOTOV: Electron spin resonance study of free radicals induced by ultraviolet light and γ -radiation in solutions of hydrogen peroxide in ammonia (175)	88
N. E. KHAZANOVA and L. S. LESNEVSKAYA: Diffusion in gaseous solutions near the critical point for liquid-gas equilibrium (76)	38		
A. G. STROMBERG and E. A. ZAKHAROVA: Diffusion coefficients of metals in mercury. II. Some regularities (81)	41		

E. N. CHISLOVA and I. N. PUTILOVA: Protective effect of acrylonitrile in the acid corrosion of metals	(178)	90	D. P. MILENINA and N. K. RUDNEVSKII: Effect of surface tension of melts in the spectroscopic analysis of metals and alloys	(258)	140
I. M. KOLESNIKOV, V. A. TULUPOV, and G. M. PANCHENKOV: Mechanism and kinetics of the cracking of cumene on crystalline aluminium silicate	(182)	92	N. F. OTPUSHCHENNIKOV and V. M. TUTOV: Velocity of sound in liquids	(260)	141
B. V. MOSKVICHEV and G. V. SAMSONOV: Non-exchange sorption of electrolytes with organic ions	(187)	94	V. M. KAMYSHOV, O. A. ESIN, and S. K. CHUCHMAREV: Wetting of nitrides of transition elements by molten oxides and metals	(262)	142
D. N. SHIGORIN, V. G. PLOTNIKOV, and V. K. POTAPOV: The nature of the electronic states of molecules and the mechanism of their reactions. I. The role of $n\pi^*$ - and $\pi\pi^*$ -states of molecules in their decomposition reactions	(192)	97	G. A. SORINA and G. D. EFREMOVA: Apparatus for visual investigation of p - V - T relations in the critical region	(264)	143
V. K. POTAPOV and D. N. SHIGORIN: Relation between nature of electronic states of the acetone molecule and mechanism of its breakdown on electron bombardment	(200)	101	Kh. I. IBRAGIMOV, N. L. POKROVSKII, and P. P. PUGACHEVICH: Combined apparatus for the measurement of the surface tension of metallic solutions	(266)	145
M. Ya. POPEREKA and A. S. BYLINA: Effect of a sinusoidal current on structure and internal stresses in electrodeposited zinc	(203)	104	I. E. VOLOKHONOVICH, E. F. NOSOV, and L. B. ZORINA: Solubility of tetrafluoroethylene in water	(268)	146
O. N. BREUSOV: Some types of equilibrium diagrams for binary systems	(207)	107	The Sixth Ukrainian Republic Conference on Physical Chemistry dedicated to the ninetieth anniversary of the birth of Academician L. V. Pisarzhevskii (Report)	(271)	148
G. E. ZAIKOV and Z. K. MAIZUS: Liquid-phase oxidation of butane-2,3-dione as intermediate in the oxidation of butan-2-one	(211)	109	The universal decimal classification and its use in the systematic arrangement of scientific and technical information	(275)	151
V. Yu. GANKIN, D. P. KRINKIN, and D. M. RUDKOVSKII: Equilibrium formation of carbonyls of cobalt from its salts	(215)	112			
K. A. SHARIFOV: Calculation of the entropy of solids	(218)	113	February		
A. V. NIKOLAEV, Yu. A. DYADIN, I. I. YAKOVLEV, V. B. DURASOV, N. I. YAKOVLEVA, and I. D. KHOL'KINA: Temperature dependence of mutual solubility in systems formed by water with an organophosphorus extractant. III. Effect of ester radical on mutual solubility of liquids	(221)	115	N. I. KOBOZEV: Physicochemical simulation of information and thought processes. I. Thermodynamics of the information process	(281)	153
N. F. ERMOLENKO and N. S. REPINA: Effect of gelatin on the formation of aluminium hydroxide, and on the porous structure and adsorption properties of aluminium oxide	(223)	117	D. N. SHIGORIN and V. G. PLOTNIKOV: Nature of electronic states of molecules and mechanism of their transformations. II. Nature of the primary act in photochemical and catalytic processes	(295)	160
A. A. ROZEN and V. V. SAGALOVICH: Temperature dependence of kinetics of heterogeneous decomposition of tungsten carbonyl	(226)	118	M. L. CHEPELEVETSKII: Periodic System of atomic nuclei	(307)	167
V. M. GRYAZNOV and V. D. YAGODOVSKII: The nature of the motion of benzene molecules adsorbed on quartz	(227)	119	L. V. RADUSHKEVICH: Significance of longitudinal diffusion in the filtration of aerosols through layers of fibrous materials	(317)	172
E. P. AGEEV, G. M. PANCHENKOV, and M. A. DEEV: Thermal diffusion in the vapour of binary mixtures of propanol and butanol isomers	(229)	121	Z. K. MAIZUS, I. P. SKIBIDA, and N. M. EMANUEL': Mechanism of the catalytic action of copper stearate in the oxidation of <i>n</i> -decane	(322)	174
M. M. GERNER, B. A. ZADOROZHNYI, L. V. RYABINA, V. N. BATOVSKII, and V. I. SHARCHILEV: Infrared spectra of eugenol and zinc eugenolate	(231)	122	O. DOBIS, I. NEMES, and R. KEREPES: Relative reactivity of organic acids in their liquid-phase reaction with free methyl radicals	(328)	177
G. M. PANCHENKOV, E. P. AGEEV, and A. A. KORYTIN: Thermal diffusion in the vapour of binary mixtures of certain organic substances	(234)	123	N. G. ZARAKHANI and M. I. VINNIK: Kinetics and mechanism of reactions in concentrated strong acids. XI. Beckmann rearrangement of cyclohexanone oxime in sulphuric acid and in oleum	(333)	179
N. I. ALEKSEEVA, D. P. TIMOFEEV, and E. M. SHARFOVA: Kinetics of the adsorption of benzene and <i>n</i> -hexane vapour on moulded NaX zeolite	(238)	126	R. S. RYABOVA, I. M. MEDVETSKAYA, and M. I. VINNIK: Acidity function of aqueous sulphuric acid solutions	(339)	182
S. N. GADZHIEV: Enthalpy of formation of selenium dioxide	(241)	128	G. A. AKSEL'RUD and L. A. POKHODENKO: Kinetics of a heterogeneous reaction between a solid and a liquid accompanied by the formation of an insoluble solid phase	(346)	186
P. N. KOMAROV: Oxidation of <i>p</i> -xylene initiated by γ -radiation	(243)	129	G. M. PANCHENKOV, I. M. KOLESNIKOV, and E. A. MOROZOV: Kinetics of the alkylation of toluene with ethylene on an aluminosilicate catalyst at atmospheric pressure	(351)	189
A. V. STORONKIN: Some problems of the thermodynamics of multicomponent heterogeneous systems. VII. The initial shape of the curve representing the coexistence temperature of the phases in three-component eutectic and peritectic systems	(247)	132	G. A. YUNITSKII: Application of Debye's theory [of specific heats] to anisotropic structures	(357)	192
A. S. SHASHKOV, V. M. MOZZHUKHINA, I. V. KRYLOVA, and N. I. KOBOZEV: Electron emission study of adsorption catalysts. II. Platinum on zinc oxide	(250)	134	P. G. MASLOV, A. A. ANTONOV, and Yu. P. MASLOV: Derivation of internally self-consistent formulae for the dependence of thermodynamic functions of temperature and pressure	(362)	194
A. P. FILONENKO, T. S. USTINOVA, and I. V. KRYLOVA: Electron emission study of adsorption catalysts. III. Silver and gold on zinc oxide	(253)	136	Yu. Ya. FIALKOV and Yu. Ya. BOROVNIKOV: Dielectric constants of binary liquid systems with non-interacting components	(371)	198
M. Kh. KARAPET'YANTS and A. I. VOROB'EVA: Approximate methods for the determination of the critical density and critical concentration	(255)	138	Yu. A. EPIKHIN, M. S. STAKHANOVA, and M. Kh. KARAPET'YANTS: Volume and heat capacity changes in aqueous salt solutions. IV. The potassium chloride-potassium iodide-water and potassium chloride-potassium fluoride-water systems	(377)	201
			R. L. SNEZHNOI: Thermodynamics of the initial stages in phase transformations	(383)	204
			Yu. A. KOPYLOV, Yu. M. STOLOVITSKII, and T. N. TROFIMOVA: Nature of processes determining the occurrence of photoconduction in organic liquids	(389)	207

D. B. CHIMITDORZHIEV: Ultrasonic study of some physicochemical properties of non-aqueous electrolyte solutions	(395)	211	S. I. ZHDANOV and B. A. KISELEV: Simultaneous adsorption of sulphide anions and tetrabutylammonium cations	(484)	262
S. G. KATAL'NIKOV and R. M. PARAMONOV: Boron trifluoride-phenetole complex	(401)	214	V. S. SOLDATOV and M. S. BESPAL'KO: Selective properties of weakly acid cation-exchange resins. II. Hydrolysis of carboxylic acid resins in the ammonium form	(486)	263
G. Z. BLYUM, G. T. DANIELOVA, and L. N. EFANOVA: Liquid-solid phase equilibrium in the system trichlorosilane-carbon tetrachloride	(407)	217	L. B. REZNIK and D. N. KOVALENKO: The mechanism of the electrochemical reduction of tellurite ions at a dropping mercury electrode	(489)	265
G. N. GORSHKOVA, M. A. CHUBAROVA, V. I. KASATOCHKIN, A. M. SLADKOV, and L. Yu. UKHIN: Absorption spectra of aromatic azoethynyl compounds	(411)	220	S. V. GORBACHEV and A. B. KRAVCHINSKII: Non-convective concentration polarisation under steady-state electrolysis conditions	(492)	267
N. M. ZHIRNOVA, K. V. ASTAKHOV, and S. A. BARKOV: A spectrophotometric study of indium(III)-diethylenetriaminepenta-acetic acid complexes	(417)	222	D. I. TSEKHOVOL'SKAYA and B. M. MERENKOVA: Infrared spectra of titanium oxide chloride in titanium tetrachloride solution	(495)	269
M. S. SAFONOV: Solution of the problem of sorption dynamics with allowance for longitudinal diffusion	(422)	225	B. Ya. LADYGIN and V. V. SARAEVA: Composition of products of the radiolytic oxidation of methanol	(497)	271
A. V. KISELEV and Ya. I. YASHIN: Gas chromatography, on a graphitised carbon black, of molecules differing in geometrical structure	(429)	228	N. G. KROKHIN: Liquid-vapour equilibrium relations in the system benzyl chloride-benzyl alcohol-benzyl acetate. II. The binary systems benzyl alcohol-benzyl acetate and benzyl chloride-benzyl acetate	(500)	273
A. I. POKROVSKAYA and V. S. SOLDATOV: Selective properties of ion-exchangers based on chloroprene rubber	(434)	231	V. F. ZHILIN, V. L. ZBARSKII, G. M. SHUTOV, and E. Yu. ORLOVA: Technique for the investigation of the kinetics of rapid exothermic reactions	(504)	275
A. A. KRYLOVA, V. S. SOLDATOV, and G. L. STAROBINETS: Thermodynamics of ion exchange on sulphonated copolymers of styrene and divinylbenzene. VIII. Exchange of alkaline earth metal ions with hydrogen	(438)	233	N. F. STAROSTENKO and E. P. STAROSTENKO: Surface fluidity of mercury (Letter)	(507)	277
A. A. KONOPLINA and L. A. NIKOLAEV: Catalytic properties of lead compounds [in the decomposition of hydrogen peroxide]	(442)	235	A. N. KIRGIN'TSEV and L. N. EFANOV: The activation energy for the viscosity and electrical conductivity of a liquid	(508)	277
G. A. SHAGISULTANOVA, L. N. NEOKLADNOVA, and M. A. KOVAL'CHUK: Radiolysis of mixed nitroamine complexes of cobalt(III) and hexanitrocobaltate(III)	(446)	238	Notice from the Organising Committee of the Conference on "The Role of Solvation in Chemical Reactions"	(510)	278
S. I. DRAKIN, L. V. LANTUKHOVA, and M. Kh. KARAPET'YANTS: Specific heats of lithium, sodium, and potassium salt solutions in methanol	(451)	240	March		
J. A. FAUCHER and J. V. KOLESKE: Relation between molecular weight and glass temperature	(456)	243	N. L. YARYM-AGAEV: Thermodynamics of mixtures of molten salts. VII. Vapour pressure in nominally ideal systems	(513)	279
V. K. SEMENCHENKO and E. D. SOLDATOVA: Thermodynamic stability of germanium and silicon near the absolute zero	(458)	244	K. K. STRELOV and I. L. SHCHETNIKOVA: Simulation of surface energy	(516)	280
G. A. SAMGINA: Relation between the velocity of sound in a liquid and the vapour pressure	(460)	246	V. M. CHERTOV, D. B. DZHAMBAYEVA, A. S. PLACHINDA, and I. E. NEIMARK: The hydroxy-groups on the surface of and within silica gel globules obtained by the hydrothermal treatment of hydrogels	(520)	282
M. M. SHUL'TS and S. A. SIMANOVA: Activity coefficients of ammonium bromide in aqueous solutions at 25°	(462)	247	G. M. PANCHENKOV, I. M. KOLESNIKOV, and E. A. MOROZOV: Kinetic equations for the alkylation of toluene with ethylene on an aluminosilicate catalyst at atmospheric pressure	(526)	285
N. E. KHAZANOVA and L. S. LESNEVSKAYA: Diffusion in the carbon dioxide-ethane system near the critical liquid-vapour equilibrium point	(464)	248	V. G. SAMOILOVICH, M. P. POPOVICH, Yu. M. EMEL'YANOV, and Yu. V. FILIPPOV: Electrical theory of ozonisers. XII. Arcing voltage in oxygen-ozone mixtures	(531)	287
I. NEMES, N. N. UGAROVA, and O. DOBIS: Effects of molecular structure and of solvent on the relative reactivities of carboxylic acids towards free methyl radicals in the liquid phase	(466)	249	Yu. M. ZHOOROV, G. M. PANCHENKOV, M. E. LEVINTER, M. E. KOZLOV, and B. F. MOROZOV: Heating-up of catalysts in the oxidation of carbon deposits	(537)	290
E. I. MAKSIMOV, A. G. MERZHANOV, and V. M. SHKIRO: Spontaneous ignition of thermite composition	(468)	251	M. I. SHAKHPARONOV: Inductive resonance and vibrational relaxation	(543)	292
L. L. ANDREEVA and M. Kh. KARAPET'YANTS: Heats of formation of bismuth selenite and tellurite	(470)	253	B. P. BERING, M. M. DUBININ, E. G. ZHUKOVSKAYA, and V. V. SERPINSKII: Adsorption of argon and nitrogen on NaX zeolite modified by treatment with water	(549)	296
V. S. GOLUBEV and G. M. PANCHENKOV: Relation between kinetic theories of chromatography and the layer method for calculating the dynamics of equilibrium sorption and ion exchange	(473)	254	A. B. FASMAN, Z. N. NOVIKOVA, and D. V. SOKOL'SKII: Adsorption of carbon monoxide on palladium in aqueous solutions	(556)	299
N. I. STROGANOVA, S. A. KHASAN, G. I. EMEL'YANOVA, and V. P. LEBEDEV: Catalytic activity of the platinum-group metals towards the decomposition of hydrogen peroxide	(475)	256	M. A. SHABUROV and K. M. SALDADZE: Behaviour of hydroxide forms of the strongly basic anion-exchange resins AV-17 and AV-27 when heated in water and in certain alcohols	(561)	302
K. A. CHERVINSKII and A. M. IVANOV: Role of the induction period in the catalysed oxidation of p-xylene	(477)	257	I. F. BAKHAREVA and A. F. KRYLOV: Effect of reverse stages on the kinetics of chemical reactions	(568)	306
I. A. VASIL'EVA and S. D. NIKITINA: Thermodynamics of the calcium-tungsten-oxygen system	(480)	259	O. PESHEV and F. F. VOL'KENSHTEIN: Some irreversible processes accompanying chemisorption on semiconductors	(574)	308
E. M. KUZNETSOVA and G. M. PANCHENKOV: Separation of lithium and sodium chlorides by extraction	(481)	260			
Yu. M. MARTYNOV and G. A. AFANAS'EVA: Adsorption of phosphoryl(V) chloride on silica gel from binary solutions	(483)	261			

- A. G. BEZUS and A. V. KISELEV: Energy of adsorption of ethane and ethylene on different kinds of surfaces. III. Isotherms and heats of adsorption of ethane and ethylene on hydroxylated and dehydroxylated silica surfaces (580) 311
