

CONTENTS OF VOLUME 41, 1967

January

V. I. TSIVENKO and I. A. MYASNIKOV: Electrical conductivity of thin films of zinc oxide in the chemisorption and photolysis of ammonia	(3)	1	M. P. MOKHNATKIN: Some discrepancies in the conditions of thermodynamic stability	(110)	56
R. V. MERTSLIN, N. I. NIKURASHINA, and L. A. KAMAEVSKAYA: Properties of the heterogeneous region in ternary liquid systems in which one binary system predominates	(8)	4	N. N. MATORINA, L. V. SHEPETYUK, and K. V. CHMUTOV: Sorption of diethylenetriaminepenta-acetic and ethylenediaminetetra-acetic acids by KU-2 cation-exchange resin. I. Sorption isotherm on the cation exchanger in the H-form	(112)	57
S. D. FEDOSEEV: Regions in which heterogeneous processes occur in the gasification of a solid fuel	(14)	6	A. N. PRAVEDNIKOV, V. A. SHARPATYI, N. V. ELISEEVA, N. V. ZAKATOVA, and V. I. FRANTS: Conjugation in systems of the types $C_6H_5Si(CH_3)_2$, $A.Si(CH_3)_2.C_6H_5$ and $C_6H_5.A.C_6H_5$	(118)	60
Kh. A. ARONOVICH, L. P. KASTORSKII, and K. F. FEDOROVA: Some physicochemical properties of ethyl methyl ether and its mixtures with diethyl ether	(20)	9	V. P. VASIL'EV: Calculation of standard heats of reaction in solution	(121)	61
A. A. LUR'E: Separation of a mixture of ions by precipitation chromatography	(25)	12	D. B. BALASHOV: Thermodynamic properties of nitroglycerin powders at pressures up to 26 000 kgf cm^{-2} and temperatures between 20° and 92°C. II. Specific heats	(126)	64
P. I. PROTSENKO, B. S. MEDVEDEV, O. A. D'YACHENKO, and V. M. USTINOV: Properties of solutions in the system caesium nitrite-calcium nitrite-water and compounds of the type $MCa(NO_2)_3 \cdot 2H_2O$ ($M = Na, K, Rb, Cs$)	(30)	15	N. N. MATORINA, L. V. SHEPETYUK, and K. V. CHMUTOV: Sorption of diethylenetriaminepenta-acetic and ethylenediaminetetra-acetic acids by KU-2 cation-exchange resin. II. Heats of sorption of diethylenetriaminepenta-acetic and ethylenediaminetetra-acetic acids on cation exchangers with various contents of divinylbenzene	(131)	66
T. N. FILATOVA, A. A. TOLSTOPYATOVA, and A. A. BALANDIN: Catalytic properties of lutetium in dehydrogenation and dehydration of alcohols and dehydrogenation of tetralin	(35)	18	E. N. BORISOVA and E. N. EREMIN: Kinetics and mechanism of the transformation of simple hydrocarbons at low pressures in the glow discharge. IV. Transformation of methane	(137)	69
G. A. GALKIN, A. V. KISELEV, and V. I. LYGIN: Change in the intensity of the absorption band due to free hydroxy-groups on silica surface as a characteristic of adsorption interaction	(40)	20	V. N. BELEVSKII and L. T. BUGAENKO: Radiation chemistry of oxychlorine compounds. V. Electron spin resonance study of the radiolysis of aqueous solutions of perchloric acid	(144)	73
N. K. DZHEMILEV, S. I. POPEL', and B. V. TSAREVSKII: Density and surface properties of iron-cobalt-nickel melts at 1550°C	(47)	24	A. F. FROLOV: Quantitative relations in a liquid-liquid two-phase quaternary system	(152)	77
I. N. MAKSIMOVA: Free energy, entropy, and enthalpy of ionic equilibria in aqueous solution at high temperatures	(52)	27	G. A. KURKCHI and A. V. IOGENSEN: Gas-chromatographic investigation of solutions of alkynes. I. Thermodynamic properties of the solutions	(158)	81
N. D. DENISOVA, E. K. SAFRONOV, A. I. PUSTIL'NIK, and O. N. BYSTROVA: Boundary liquid-vapour curve and saturated vapour pressure of zirconium and hafnium tetrachlorides	(59)	30	V. D. YAGODOVSKII and M. PORTIL'YA: Effect of the adsorption of ammonia on the temperature coefficient of the resistivity of gold films	(164)	83
I. A. SEMIOKHIN and Yu. P. ANDREEV: Mechanism of the redistribution of isotopes during the dissociation of carbon dioxide in the silent discharge	(64)	33	V. B. LUK'YANOV, Yu. M. EMEL'YANOV, and I. F. ALEKSANDROVA: Synthesis of oxygen-containing organic compounds in electric discharges. I. Selection, by <i>a priori</i> ranking, of conditions for the synthesis of aliphatic aldehydes and acids in electric discharges	(170)	86
P. I. PROTSENKO and R. P. SHISHOLINA: Densities and molar volumes of molten mixtures of lithium and caesium nitrites and nitrates	(71)	36	A. G. MERZHANOV, V. G. ABRAMOV, and L. T. ABRAMOVA: A thermographic method for the investigation of the kinetics of heat evolution	(179)	90
G. V. ERMAKOV and V. P. SKRIPOV: Saturation line, critical parameters, and the maximum degree of superheating of perfluoro-paraffins	(77)	39	A. A. ZHUKOV: The effect of oxygen on the activity of carbon in liquid iron	(185)	93
O. S. CHISTOZVONOVA, G. M. DUGACHEVA, and A. G. ANKIN: Zone melting and thermal analysis of the acetonitrile-benzene system	(82)	42	V. S. PARBUZIN, G. M. PANCHENKOV, B. Kh. RAKHMUKOV, and G. V. SANDUL: Sorption equilibria in ternary mixtures of isotopic hydrogen molecules on synthetic zeolites	(193)	97
V. P. MOROZOV and N. T. STORCHAI: Comparative study of the force constants of the hydrogen peroxide and disulphane molecules	(86)	45	A. N. KORNILOV, I. M. USHAKOVA, and S. M. SKURATOV: Standard heat of formation of zirconium dioxide	(200)	101
S. V. ZEMSKII and A. P. FOKIN: Solubility of carbon in solid chromium	(93)	47	Yu. P. BLAGOI, B. N. ZIMOGLYAD, and G. G. ZHUN': Selective low-temperature adsorption of ortho-hydrogen	(205)	104
S. I. DRAKIN, L. V. LANTUKHOVA, and M. Kh. KARAPET'YANTS: Heat capacity of monatomic cations in aqueous solution	(98)	50			
B. P. BURYLEV: Calculation of the viscosity of metallic alloys	(104)	53			
A. N. KIRGINTSEV and A. V. LUK'YANOV: Isopestic study of sodium chloride-potassium chloride-calcium chloride-water solutions at 25°C	(107)	54			

- T. V. YAGODOVSKAYA and L. I. NEKRASOV: The problem of the higher hydrogen peroxide and frozen radicals. Infrared absorption spectra of the peroxy-radical condensate at various temperatures (211) 108
- V. A. KOGAN, L. E. LEMPERT, and G. V. NEMIROV: Dipole moments and structure of chelate complexes of zinc with aromatic Schiff bases (216) 111
- F. A. FEIZKHANOV, G. M. PANCHENKOV, and I. M. KOLESNIKOV: Multifactor planning of an experiment using kinetic equations (221) 113
- A. S. MOZZHUKHIN, V. A. MITROPOL'SKAYA, L. A. SERAFIMOV, A. I. TORUBAROV, and T. S. RUDAKOVSKAYA: Liquid-vapour phase equilibrium in binary mixtures of some oxygen-containing products at 760 mmHg (227) 116
- L. M. VINOGRADOVA, D. A. VYAKHIREV, and A. A. ZHUKHOVITSKII: Relative roles of external and internal diffusion in the blurring of chromatographic bands (233) 119
- T. M. KUSHNER, G. I. TATSIEVSKAYA, and L. A. SERAFIMOV: Liquid-vapour phase equilibrium in the water-formic acid-propionic acid system at atmospheric pressure (237) 121
- L. G. GARKAVENKO, O. M. DZHIGIT, A. V. KISELEV, K. N. MIKOS, and G. G. MUTTIK: Dependence of the adsorption of n-pentane by an NaX type of zeolite on the gas pressure and the temperature (244) 124
- M. I. VINNIK, I. M. MEDVETSKAYA, L. R. ANDREEVA, and A. E. TIGER: Kinetics and mechanism of reactions in concentrated strong acids. XII. Kinetics of the hydrolysis of o-nitroacetanilide in aqueous sulphuric acid (252) 128
- February
- V. A. Kargin (-) 133
- Yu. A. KRUGLYAK: The LCBO-MO method. I. Straight-chain paraffins from methane to tridecane (265) 133
- G. S. SHIMONAEV: The zero-point energy of the molecules of straight-chain alkanes and isoalkanes in the crystal lattice (273) 138
- A. A. TRAPEZNIKOV and T. A. LOMONOSOVA: Polymorphism and formation of hydrates of aliphatic alcohols with an odd number of carbon atoms and their equilibria with monolayers (277) 139
- S. P. MISKIDZH'YAN, A. L. KORSUNSKAYA, and N. G. KUDRYA: Phenyl isothiocyanate-amine systems (287) 144
- G. G. SHCHEGOLEV, L. S. CHURAKOVA, and A. A. TRAPEZNIKOV: Effect of lithium naphthenate on the properties and microstructure of model lithium lubricating grease (291) 146
- A. A. KHORKIN, O. N. TEMKIN, and R. M. FLID: Kinetics of the acid hydrolysis of hydrocyanic acid (299) 150
- V. V. GORBUNOV and K. K. ANDREEV: Effect of the fused layer on the stability of the burning of powdered explosives (303) 152
- E. A. SILIN', V. F. MOTORYKINA, M. A. GEIDERIKH, B. E. DAVYDOV, and B. A. KRENTSEL': Dichroism in oriented polyacrylonitrile films irradiated with infrared light (309) 155
- A. I. RUSANOV: Application of the abridged Le Chatelier-Braun principle to surface phenomena (312) 157
- V. B. KOGAN and I. S. SEDETSKAYA: Test of the thermodynamic self-consistence of phase equilibrium data for ternary and multicomponent systems (317) 159
- E. K. ZAKHAROV: Some relations of the binodal curve conjugate composition polytherms for systems with limited miscibility (323) 162
- L. P. RUZINOV and G. N. VESELAYA: An estimate of errors in thermodynamic calculations (329) 164
- Yu. G. VLASOV and L. L. MAKAROV: Entropy change on formation of solid solutions of alkali halides (332) 165
- I. D. RYABCHIKOV: Excess thermodynamic functions of melts of reciprocal salt systems (337) 168
- L. V. GORBUNOV: Temperature variation of the heat capacity at constant pressure and the calculation of thermodynamic quantities. II. Calculation of the thermodynamic quantities and equilibrium constants for chemical reactions (343) 170
- A. N. KORNILOV, I. D. ZAIKIN, S. M. SKURATOV, L. B. DUBROVSKAYA, and G. P. SHVEIKIN: Standard heats of formation of tantalum carbides from the TaC phase (346) 172
- A. N. KORNILOV and I. D. ZAIKIN: Some problems of the thermochemistry of variable-composition carbides (351) 174
- L. N. KHITRIN, L. S. SOLOV'EVA, and G. E. KHAUSTOVICH: Interaction of carbon dioxide with graphite between 400° and 900°C (358) 178
- G. S. SHIMONAEV: Maximum energy of intermolecular attraction in straight-chain alkanes and isoalkanes (365) 182
- I. I. GEL'PERIN, P. E. BOL'SHAKOV, and M. G. OSTRONOV: The Joule-Thomson effect in gas mixtures at low temperatures. II. Methane-hydrogen mixtures (369) 183
- N. N. MATORINA, L. V. SHEPETYUK, and K. V. CHMUTOV: Sorption of diethylenetriaminepenta-acetic and ethylenediaminetetra-acetic acids by KU-2 cation-exchange resin. III. Sorption isotherm of diethylenetriaminepenta-acetic acid by the cation exchanger in the Na, H-form (373) 186
- V. I. SHIMULIS: Self-adsorption and surface structure (376) 187
- T. A. LOMONOSOVA and A. A. TRAPEZNIKOV: Temperature variation of the equilibrium two-dimensional pressure in monolayers of mixtures of straight-chain alcohols with odd numbers of carbon atoms (384) 191
- A. A. KRYLOVA, V. S. SOLDATOV, and G. L. STAROBINETS: Thermodynamics of ion exchange on sulphonated copolymers of styrene and divinylbenzene. X. Thermodynamic functions for the exchange of alkaline earth metals for hydrogen (391) 194
- V. V. UDOVENKO and T. F. MAZANKO: Vapour pressure in the system isopropyl alcohol-benzene-water (395) 197
- B. D. BEREZIN and A. N. DROBYSHEVA: Dissociation of zinc phaeophytinate in acid media (402) 199
- L. B. ITSIKSON: Extraction of aliphatic alcohols from their mixtures with hydrocarbons. I. Miscibility in the systems n-butyl alcohol-decane-diethylene glycol and n-pentyl alcohol-decane-diethylene glycol (409) 203
- O. V. KEDROVSKII, P. V. KOVTUNENKO, E. V. KISELEVA and A. A. BUNDEL': Interaction of oxygen with alkaline earth metal oxides. I. Equilibria in the system barium oxide-oxygen at pressures close to atmospheric (414) 205
- V. I. KORNEV, K. V. ASTAKHOV, and V. I. RYBINA: A spectrophotometric study of thallium(III) complexes of certain complexones (420) 208
- T. G. AMINOV, Yu. N. VIKTOROVA, S. A. ZELEN-TSOVA, and V. V. ZELENTSOV: Magnetic susceptibility and absorption spectra of glasses coloured with vanadium, manganese, cobalt, and nickel (426) 212
- V. V. TARASOV, V. A. TURDAKIN, G. A. YUNITSKII, and V. M. ZHDANOV: A low-temperature heat capacity study of the microchemical heterogeneity of sodium silicate and sodium borosilicate glasses (430) 213
- A. A. SLINKIN, E. A. FEDOROVSKAYA, and A. M. RUBINSHTEIN: Magnetic properties and distribution components in the nickel oxide-chromic oxide system (435) 216
- T. N. FILATOVA, A. A. TOLSTOPYATOVA, and A. A. BALANDIN: The catalytic properties of neodymium-titanium catalysts (441) 219
- M. G. KUZ'MIN, B. M. UZHINOV, and I. V. BEREZIN: The chemistry of excited electronic states of organic compounds. I. Basicity of aromatic hydrocarbons (446) 222

- N. N. KAVTARADZE and N. P. SOKOLOVA: The correlation between the spectra and structure of metal carbonyls and the interpretation of the infrared spectra of carbon monoxide adsorbed on metals. II. Interpretation of the infrared spectra of carbon monoxide adsorbed on metals (453) 225
- K. T. GEODAKYAN, A. V. KISELEV, and V. I. LYGIN: Infrared spectra of methanol and acetone adsorbed on cation-containing and "decationated" zeolites (457) 227
- D. B. BALASHOV: Thermodynamic properties of nitroglycerin powders at pressures up to 26 000 kgf cm⁻² and temperatures between 20–92°C. III. Entropy and internal energy (465) 232
- M. M. BOGORODSKII and E. N. EREMIN: Determination of the temperature in the plasma of a discharge in air at moderate pressures (470) 234
- D. N. SHIGORIN and V. A. TULUPOV: The role of quasi-aromatic rings and of the reversible change in the number of spin valences of the elements in chemical (catalytic) processes (473) 235
- M. P. GLAZYRIN and A. A. FOTIEV: A thermo-optical method for the investigation of phase transformations of salt systems (479) 239
- I. I. LAPIDUS, L. A. NISEL'SON, and A. A. KARATEEVA: Liquid-vapour equilibrium in the system trichlorosilane-phosphorus oxychloride (482) 241
- A. N. KRESTOVNIKOV and A. L. LOMOV: Activity coefficients of the components of the system bismuth-copper-antimony (485) 243
- R. F. VOITOVICH and E. I. GOLOVKO: Calculation of the reduced free energies of certain oxides (489) 245
- A. L. TSYKALO: Volume changes in aqueous solutions of hydrogen peroxide (491) 246
- A. B. ZDANOVSKII and F. I. IVANOVA: Effect of complex formation on the properties of solutions (493) 247
- A. D. BONDAR' and A. A. ROZEN: High-frequency ionisation of the vapour of metal-containing compounds and the precipitation of metals in an electrostatic field (495) 249
- I. S. KIRIN and P. N. MOSKALEV: Phthalocyanines with high specific conductance (497) 251
- V. A. TEREENT'EV and N. Kh. SHTIVEL': A new spectroscopic method for the determination of the energy of the hydrogen bond (499) 252
- Yu. V. TSEKHANSKAYA, Z. A. POLYAKOVA, and G. M. KOZLOVSKAYA: The boundary curve of chlorine near its critical point (501) 253
- N. I. NIKOLAEV, V. I. MUROMTSEV, G. G. CHUVILEVA, and M. D. KALININA: An electron spin resonance study of the exchange of manganese(II) ions on KU-2 cation-exchange resin (504) 255
- T. G. AMINOV and V. B. EVDOKIMOV: Some problems of the technique of magnetic measurements (506) 256
- A. G. ROZANOV and T. I. BULGAKOVA: A method for the determination of the partial pressure of hydrogen (509) 258
- I. I. IOFFE and G. V. DERGUNOVA: Apparatus for the investigation of the kinetics of the catalytic oxidation of alcohols under conditions where the reaction is determined by external diffusion (511) 260
- O. D. LYAKH, I. A. SHEKA, and A. I. PERFIL'EV: A new method of interpreting thermograms obtained with a Kurnakov differential thermal analyser (513) 261
- A. A. REKHARDT: Determination of the dielectric constants of solutions by a contactless method (514) 262
- G. I. BEREZIN: A six-arm resistance bridge (516) 262
- March
- M. S. BARVINOK and I. S. BUKHAREVA: Infrared spectra of hydrazine complexes of some salts of transition metals (525) 265
- O. K. DAVTYAN: The mechanism and kinetics of current-generating processes in the electrochemical combustion of gases. V. Diffusion-electrochemical kinetics (529) 267
- A. E. LUTSKII and E. I. GONCHAROVA: The N-H group as donor and acceptor of a proton in the hydrogen bond. II. Heteroassociation of secondary amines (538) 271
- V. I. BORODENKO and B. M. GUGEL': Kinetics of the adsorption of caesium vapour on zinc sulphide (545) 274
- M. E. LEVINTER and G. M. PANCHENKOV: The chain mechanism of the decomposition and condensation reactions in thermal cracking (550) 277
- V. I. MINKIN: Interaction of electronic and steric factors in aromatic azomethines (556) 280
- G. A. KURKCHI and A. V. IOGANSEN: Gas-chromatographic investigation of solutions of alkynes. II. Determination of the energy of hydrogen bonds (563) 283
- I. A. MYASNIKOV and I. N. POSPELOVA: Adsorption of hydrogen atoms on zinc oxide and its effect on electrical conductivity. I. Quantitative relations (567) 286
- V. G. MURADOV, P. V. GEL'D, and P. V. KOCHEROV: Vapour pressure over solid calcium-lead alloys (576) 290
- E. M. KUZNETSOVA, N. A. KRESOVA, and G. M. PANCHENKOV: Separation of caesium and rubidium polyhalides by extraction with a nitrobenzene solution of iodine (583) 293
- V. A. ALEKSEENKO and M. M. SENYAVIN: Potentiometric determination of exchange constants on weakly basic ion exchangers (590) 296
- P. P. PUGACHEVICH, V. V. MOGUCHEVA, and L. A. NISEL'SON: Surface tension of the trichlorides of phosphorus, arsenic, and antimony (595) 299
- G. Ya. ALEKSANDROVA, A. V. KISELEV, and Yu. A. EL'TEKOV: Adsorption of water on zeolites from solutions in hydrocarbons (600) 301
- A. A. KOLPAKCHI, E. P. BABIN, and A. A. ARTAMONOV: Alkylation of fluorobenzene by propene on Friedel-Crafts-Gustavson catalysts (606) 304
- Yu. A. BRATASHEVSKII, N. N. DYKHANOV, V. A. MOISEEV, V. N. TOPCHII, and V. R. SHILOV: Electron spin resonance of an organocopper complex (611) 307
- E. A. RAPSHITYNSKAYA: Heats of sublimation of hydrocarbons (613) 308
- S. D. LABINOV, N. V. BOIKO, and N. K. BOLOTIN: New method of calculating the constants in the Benedict-Webb-Rubin equation of state for gaseous mixtures (618) 310
- N. N. GRYAZEV and M. N. RAKHLEVSKAYA: Adsorption of organic sulphur compounds from solution on molecular sieves (622) 312
- V. A. TULUPOV and D. N. SHIGORIN: Electronic (orbital) states of species and fundamental chemical (catalytic) steps (626) 314
- S. I. DRAKIN and Yu. K. TITOVA: Temperature variation of the electrodiffusion in sodium-mercury alloys (635) 319
- O. A. OSIPOV, Yu. A. ZHDANOV, M. I. KNYAZHANSKII, V. I. MINKIN, A. D. GARNOVSKII, and I. D. SADEKOV: Luminescence and photochemistry of azomethines. I. Influence of structural factors on the luminescent and photochromic properties of azomethines (641) 322
- M. I. KNYAZHANSKII, V. I. MINKIN, and O. A. OSIPOV: Luminescence and photochemistry of azomethines. II. Influence of the medium on the photochemical properties of anils of salicylaldehydes (649) 326
- A. A. KARASHAEV, S. N. ZADUMKIN, and A. I. KUKHNO: The surface tension of gallium and its temperature variation (654) 329
- A. A. MASLOV and V. A. YURLOVA: Rectification at the copper-copper-phthalocyanine interface (656) 331
- V. S. MARKEVICH, V. A. TEREENT'EV, and N. Kh. SHTIVEL': Effect of conformation on the strength of the intramolecular hydrogen bond in ketols (658) 332
- L. L. MAKAROV, V. P. BELOUSOV, and V. N. MALYSHEV: Heats of formation of anomalous mixed crystals in the system cobalt chloride-ammonium chloride-water at 25°C (660) 333

D. L. LEICHKIS: Segregation of soluble impurities on crystallisation	(663)	335	L. N. SIDOROV, Yu. M. KORENEV, V. B. SHOL'TS, P. A. AKISHIN, and V. P. FROLOV: A mass-spectrometric study of the thermodynamic properties of the system sodium fluoride-vanadium trifluoride	(718)	371
S. I. KOL'TSOV and V. B. ALESKOVSKII: The effect of the degree of dehydration of silica gel on the mechanism of hydrolysis of trichlorosilane	(665)	336	G. M. PANCHENKOV, V. S. GRINEV, and I. M. KOLESNIKOV: Kinetics of the gas-liquid oxidation of <i>p</i> -cymene with oxygen in acetic acid in the presence of cobalt bromide	(722)	374
A. V. FINKEL'SHTEN, V. L. POGREBNAYA, and V. P. KUMAREV: The solvatochromic effect and the catalytic hydrogenation of <i>p</i> -dimethylaminoazobenzenes	(666)	337	A. N. KRESTOVNIKOV and S. I. GORBOV: Vapour pressure of bismuth selenide	(726)	376
O. G. STRUKOV, V. A. SHLYAPOCHNIKOV, and S. S. DUBOV: The force field of the HPO molecule	(669)	339	E. F. CHERNEVA and V. A. FLORINSKAYA: The structure and properties of the glasses of the system lithium oxide-silica according to infrared spectroscopic analytical data	(728)	378
B. A. KOLACHEV: The nature of transition metal hydrides	(670)	339	A. A. SHIDLOVSKII, A. A. VOSKRESENSKII, and E. S. SHITIKOV: Heats of formation of caesium and silver bromates	(731)	380
N. G. KROKHIN: Liquid-vapour equilibrium in the system acetic acid-isopentyl alcohol-isopentyl acetate. I. The binary system acetic acid-isopentyl alcohol	(671)	340	G. V. KARPUKHINA, Z. K. MAIZUS, and L. I. MATIENKO: Reaction of ethylbenzene hydroperoxide with thiophenol in the oxidation of ethylbenzene	(733)	381
R. P. SMIRNOV and B. D. BEREZIN: Kinetics of the formation of metal complexes of symmetrical and macrocyclic compounds	(673)	342	V. Ya. MASLENNIKOVA, N. P. GORYUNOVA, and D. S. TSIKLIS: Phase equilibria in the systems nitrogen-Freon-12 and nitrogen-Freon-22	(735)	383
B. P. BURYLEV: Effect of the coordination number on the thermochemical and thermodynamic properties of solutions	(676)	343	E. G. ANISIMOVA, L. A. GALATA, R. P. EPISHEVA, Z. P. CHIRKOVA, and L. S. KOFMAN: Study of liquid-vapour phase equilibria in binary and multicomponent systems at pressures above atmospheric	(738)	384
Yu. V. FILIPPOV and V. P. VENDILLO: The electrical synthesis of ozone. XII. Effect of the length of the reaction zone	(680)	346	G. A. GALKIN, A. V. KISELEV, and V. I. LYGIN: Methods of avoiding heating of the adsorbent by infrared radiation in spectral studies on adsorbed molecules	(740)	386
L. I. PECHALIN and G. M. PANCHENKOV: Electrical conductivity of the molecular complex of boron trifluoride with anisole	(682)	347	G. V. BYKOV: The significance of the concept of electronegativity in chemistry	(743)	388
G. B. DEMIDOVICH and V. F. KISELEV: Effect of the state of the surface of the prismatic faces of highly dispersed graphite on its electrical conductivity, electron work function, and Seebeck coefficient	(684)	349	Édouard Calvet (1895-1966) (obituary)	(747)	391
V. S. MARTEM'YANOV and E. T. DENISOV: Oxidation of phenol by cobalt(III) acetylacetonate	(687)	351	Boris Borisovich Kudryavtsev (obituary)	(749)	392
P. E. BOL'SHAKOV, I. I. GEL'PERIN, M. G. OSTRONOV, and A. A. ORLOVA: The Joule-Thomson effect in gas mixtures at low temperatures. III. Mixture of nitrogen with 9.9% of methane	(689)	353	April		
G. P. PANASYUK, M. N. DANCHEVSKAYA, and N. I. KOBOZEV: A mass-spectrometric method for the investigation of the defect structure of zinc oxide	(691)	354	E. N. BORISOVA and E. N. EREMIN: Kinetics and mechanism of the transformation of simple hydrocarbons at low pressures in the glow discharge. III. Reactions of ethane	(757)	395
A. V. STORONKIN, I. V. VASIL'KOVA, and Yu. A. FEDOROV: Thermodynamics of the ternary system vanadium trichloride-chromium trichloride-potassium chloride. I. Fusion diagram	(695)	357	Yu. Ya. FIALKOV: Molar-additive properties in the physicochemical analysis of binary liquid systems	(764)	398
A. V. STORONKIN, I. V. VASIL'KOVA, I. I. KOZHINA, and Yu. A. FEDOROV: Thermodynamics of the ternary system vanadium trichloride-chromium trichloride-potassium chloride. II. Concentration regions corresponding to the existence of solid solutions	(698)	359	M. G. KUZ'MIN, B. M. UZHINOV, G. SZENT GYÖRGY, and I. V. BEREZIN: The chemistry of excited electronic states of organic compounds. II. Photochemical exchange of hydrogen in aromatic hydrocarbons	(769)	400

 Igor Vasil'evich Petryanov-Sokolov (sixtieth birthday) (2126) 1146

September

- V. P. VASIL'EV and L. A. KOCHERGINA: Effect of ionic strength on heats of ionisation of salicylic acid in aqueous solution at 25°C (2133) 1149
 L. F. KOZIN and R. Sh. NIGMETOVA: Thermodynamic properties of the liquid cadmium-indium-mercury ternary system (2139) 1152
 A. A. SHIDLOVSKII and A. A. VOSKRESENSKII: Heats of formation of caesium and cadmium sulphites (2146) 1156
 Yu. A. EPIKHIN and M. S. STAKHANOVA: Volume and heat capacity changes in aqueous salt solutions. V. The sodium chloride-sodium nitrate-water and sodium chloride-sodium perchlorate-water systems (2148) 1157
 A. F. FROLOV: Determination of composition of final solid phase in solutions for quaternary and quinary systems (2153) 1160
 D. A. KNYAZEY and A. N. BANTYSH: Calculation of separation factors in the multistage compression method for multicomponent systems (2158) 1163
 T. M. KUSHNER, E. L. KRISHTAL', G. I. TATSIEV-SKAYA, and L. A. SERAFIMOV: Study and calculation of the liquid-vapour phase equilibrium in the system formic acid-acetic acid-propionic acid at atmospheric pressure (2162) 1164
 S. I. KULICHIKHINA and B. P. NIKONOV: Vapour pressure and heat of formation of BaAl₄ (2168) 1167
 Yu. P. VOROB'EV, A. N. MEN', and G. I. CHUFAROV: Thermodynamic analysis of the equilibrium between spinel solid solutions and wustite with a variable defect structure (2171) 1169
 M. G. OSTRONOV, P. E. BOL'SHAKOV, I. I. GEL'PERIN, and A. A. ORLOVA: The Joule-Thomson effect in gas mixtures at low temperatures. IV. Mixture of hydrogen with 23% of nitrogen (2174) 1171
 V. I. RYKOV: Some physical properties of a normal liquid in the liquid-vapour system (2177) 1172
 G. L. GAL'CHENKO and N. S. ZAUGOL'NIKOVA: Heats of combustion of boron trialkyls. IV. Heats of combustion of tri-n-hexylboron (2181) 1174
 I. P. BAZAROV: Theory of the transition layer and surface tension (2185) 1177
 P. N. NIKOLAEV and I. B. RABINOVICH: Heat capacity of ethylene glycol and ethylene deuterio-glycol in the temperature range 80-300°K (2191) 1179
 D. S. TSIKLIS and V. M. PROKHOROV: Phase equilibria in systems containing fluorine compounds (2195) 1182
 D. A. KNYAZEY, A. N. BANTYSH, and A. A. IVLEV: Thermodynamics of isotope exchange. V. The chemical separation of the isotopes of medium and heavy elements (2200) 1184
 A. M. EVSEEV and P. I. OZHEGOV: Critical temperature and condensation kinetics of a molecular beam of antimony (2206) 1187
 V. S. SOLDATOV, M. S. BESPAL'KO, and L. V. NOVITSKAYA: Selective properties of weakly acid cation-exchange resins. III. Selectivity of the exchange of alkali metal ions for ammonium ions (2210) 1189
 V. S. SOLDATOV and G. S. MANENOK: Selective properties of weakly acid cation-exchange resins. IV. Equilibria between phosphonic and phosphonous acid cation exchangers and aqueous solutions (2214) 1192
 I. A. KIROVSKAYA, L. G. MAIDANOVSKAYA, and V. N. NAGOVITSIN: Adsorption of carbon monoxide on germanium (2219) 1194
 A. G. BEZUS and A. V. KISELEV: Dependence of the degree of adsorption of ethane by NaX zeolite on pressure and temperature (2224) 1197
 L. G. ANTONOVA and A. I. KRASIL'SHCHIKOV: Activated adsorption and ionisation of hydrogen on various metals (2230) 1201
 V. L. KEIBAL, A. V. KISELEV, I. M. SAVINOV, V. L. KHUDYAKOV, K. D. SHCHERBAKOVA, and Ya. I. YASHIN: Differential heats of adsorption of straight-chain alkanes at low surface coverages of different adsorbents on the basis of gas-chromatographic data (2234) 1203
 I. M. MEDVETSKAYA, L. R. ANDREEVA, and M. I. VINNIK: Partition coefficients of o-nitroacetanilide and 2,4-dinitroacetanilide between carbon tetrachloride and aqueous sulphuric acid solutions (2240) 1206
 O. I. KACHURIN: Prevailing equilibria in 88-99% sulphuric acid (2245) 1209
 E. K. ZAKHAROV: Miscibility in the system pentyl alcohol-water in the presence of potassium chloride (2252) 1213
 N. N. UGAROVA and I. V. BEREZIN: Association in aqueous alcoholic solutions. IV. Effect of hydrogen bonds on the interaction between methyl radicals and t-butyl alcohol in aqueous solutions (2255) 1215
 N. E. KHOMUTOV: Activity coefficients of ions and their solvation (2258) 1216
 N. P. CHEKHUNOVA and P. I. PROTSENKO: Activity coefficients of the nitrites of sodium, potassium, and magnesium (2266) 1220
 Zh. E. GRABOVSKAYA and M. I. VINNIK: Partition coefficients of nitric acid between dichloroethane and aqueous sulphuric acid (2269) 1221
 L. A. MAKAREVICH, E. S. SOKOLOVA, and G. A. SORINA: Pressure-volume-temperature-composition relationship in dilute solutions near the critical point of the pure solvent. I. Sulphur hexafluoride [-carbon dioxide] (2273) 1223
 G. M. PANCHENKOV, Yu. I. LAZ'YAN, and Yu. M. ZHO-ROV: Kinetics of the isothermal regeneration of a fixed catalyst layer (2276) 1225
 A. A. ABRAMOV and E. B. POPOV: Propagation of a chemical reaction front in a solid (2282) 1227
 Yu. G. BASOV and I. A. TIKHOMIROV: Isotope effects in the oxidation of iron and copper electrodes in an arc discharge (2286) 1229
 Z. BRAUN, L. I. NEKRASOV, N. I. KOBOZEV, and I. I. SKOROKHODOV: Reduction of zirconium tetrabromide with atomic hydrogen in a glow discharge (2289) 1231
 Yu. I. KHRAMTSOV and N. I. NIKOLAEV: The role of permeability under conditions of external-diffusion-dependent kinetics of ion exchange (2295) 1234
 Zh. V. STREL'NIKOVA, G. I. EMEL'YANOVA, and V. P. LEBEDEV: New method for determining the composition of an active centre on a metallic catalyst (2299) 1236
 I. P. VYRODOV: Diffusion-controlled reaction kinetics. III. Attainment of limiting concentration of a substance at a solid surface in the case of a first-order reaction (2303) 1238
 A. M. ABOIMOV and S. V. GORBACHEV: Kinetics of the electrochemical oxidation of pyridine in anhydrous acetic acid at temperatures between 70° and 300°C (2307) 1240
 I. V. KUDRYASHOV and V. L. KOCHETKOV: Kinetics of the cathodic reduction of maleic acid at a platinised platinum electrode (2313) 1244
 O. K. DAVTYAN and F. V. MAKORDEI: Application of group theory to quantum chemistry. III. The method of cyclic permutations of equivalent orbitals (2321) 1248
 G. V. GOBOV and R. N. NURMUKHAMETOV: Vibronic absorption spectra of phenylbenzoxazoles (2330) 1252
 D. N. SHIGORIN, A. D. FILYUGINA, and V. K. POTAPOV: Role of intramolecular hydrogen bonding in the ionisation and dissociation of compounds (2336) 1255
 L. A. LENSII: Measurement of the activity of tritiated water preparations using windowless flowing-gas counters (2340) 1257

- A. V. FINKEL'SHTEIN, A. I. YAROSHENKO, E. Yu. BEL-YAEV, and S. V. LUK'YANCHUK: Solvatochromism of some aliphatic-aromatic nitrosamines and the Hammett constants (2343) 1259
- N. N. MATORINA, L. V. SHEPETYUK, and K. V. CHMUTOV: Kinetics of the sorption of rare-earth elements in the presence of polyamino-polycarboxylic acids (2345) 1260
